THE VISION OF POWERSPLASH PROJECT

a multi-award-winning production company

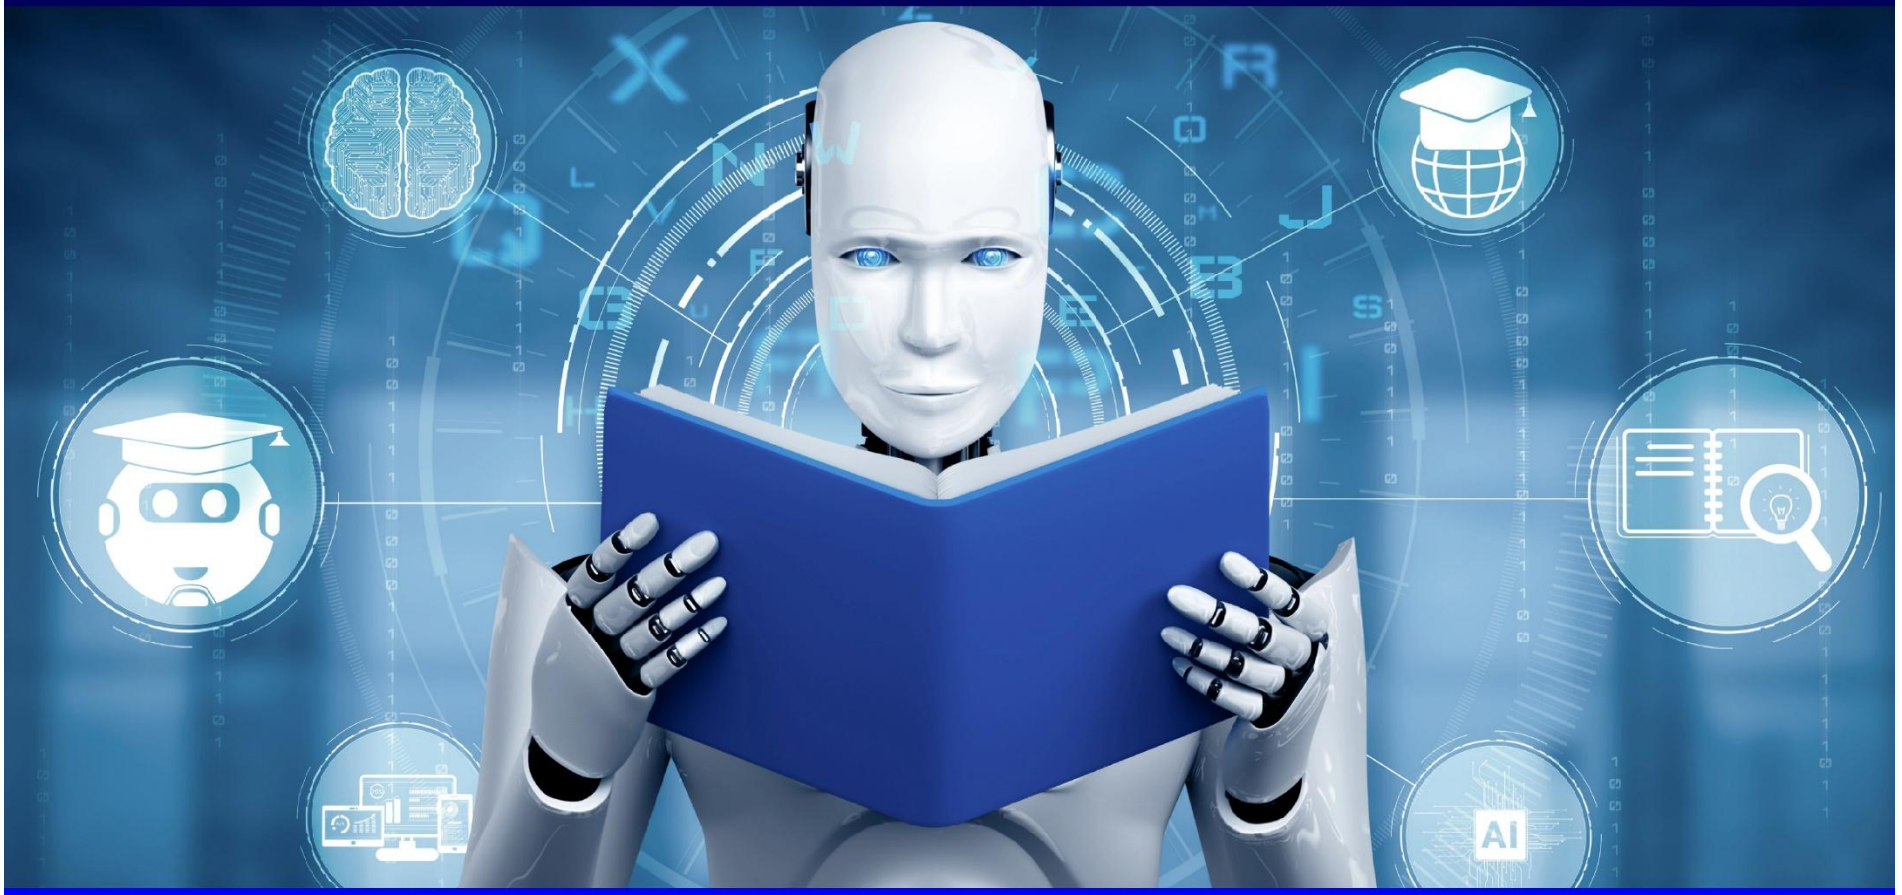

In addition to business and educational training films, PowerSplash Project is respected for their documentaries and music videos. Many of these films have been featured in over 430 film festivals, and have won over 200 awards to date.

The mark of a successful training presentation is the amount of sustainable information and retention for the viewer. Knowing time is scarce and attention spans are short, we have designed four-to-thirty-minute training solutions available via streaming, USB, or an LMS course.

Creating a business orientation series for students, temporary workers, new hires, and even seasoned professionals, we believe that true education and transformation occur when the whole of a subject is presented in full rather than just in part. Widening one's perspective while acquiring vast knowledge is crucial to understanding a subject, ourselves, and others. Now, let us apply this to business. For an organization to be successful, sustainable, and pleasant both for the employee and the customer, it is imperative that standardization is in place, enforced, and exampled from the top down. An impressive resume does not necessarily guarantee a constructive attitude, common sense, or team player. To understand the components that comprise a successful organization, one must shine a light on the entire operation – and how each part adds to the whole.

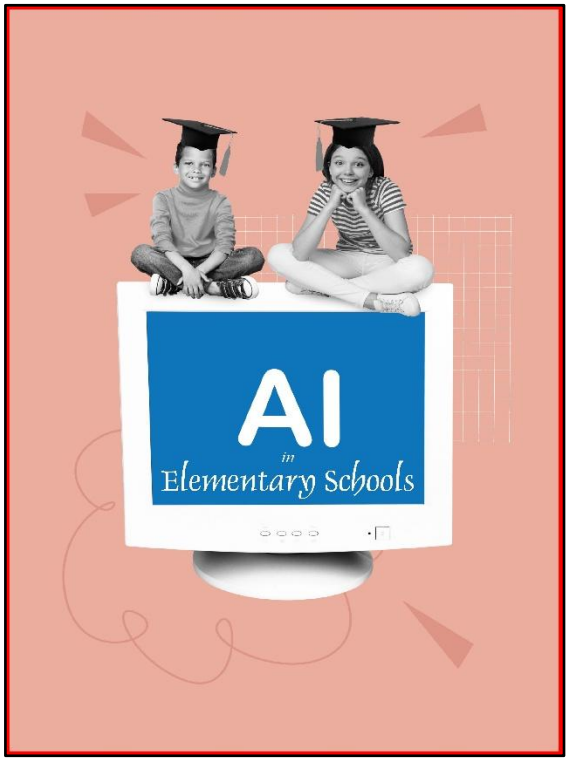

Imagine a workplace that is productive, sustainable, enjoyable, and safe. And imagine coworkers that are energized, compassionate, cooperating, and creative. Every employee and manager benefit from ongoing training. Indeed, transformation in the workplace begins with transformation within each person. Themes of positive self-image, compassion, and responsibility flow through every frame. Rather than the endless and unproductive cycles of complaining; let's focus on job responsibilities and expectations. The results of an effective training program are enormous when everyone is supported, educated, and on the same page.

- **Learn the advantages and disadvantages of AI**
- **Learn about AI Curriculum to engage young learners**
- **Learn how to select the right AI tools**

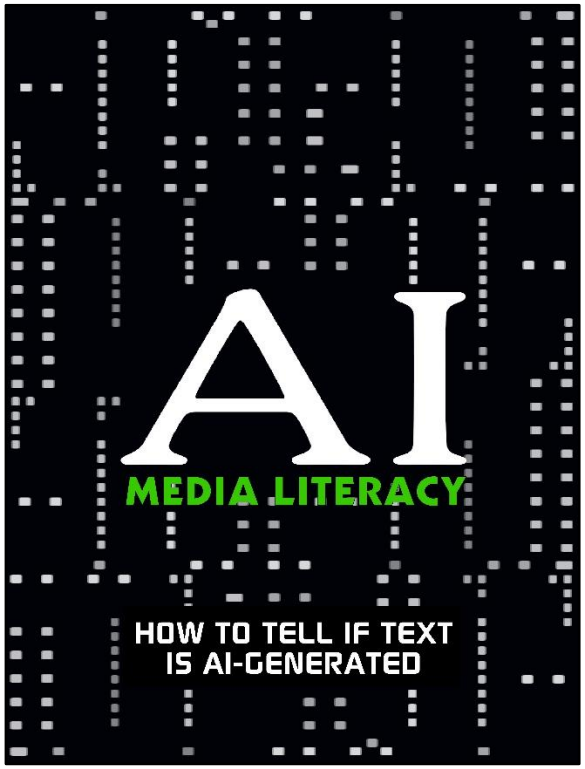

Artificial Intelligence is when programmed computers and machines can actually learn and think like humans. And, much like you, AI can recognize voices and faces as well as suggest books, music, or videos based on what we enjoy. Keep in mind that AI is powerful because it contains a vast amount of information; but AI is not human. It doesn't have emotions or beliefs or even an awareness of self, and it can make mistakes. It is important to verify.

AI in High Schools
19:05

- **Learn what AI can do for high school students**
- **Learn popular AI tools for research projects**
- **Learn how to evaluate AI's performance**

Today, almost every industry is being transformed by AI. Artificial Intelligence is revolutionizing healthcare, science, labor, transportation, education, and finance. AI is a tool and requires our ability to critically think, process, and verify. AI is an assistant that can spark curiosity, stretch our imagination, probe our mindsets, and challenge our beliefs. If used responsibly, AI will improve our problem-solving skills and help us address issues in the real world.

Now, AI can help you brainstorm, stimulate your thinking, and enhance your writing; but AI should not be used to do all the work. Keep in mind that original thinking will set you apart from the others. As AI tools advance, it is vital we be aware of accurate and reliable information. To preserve transparency, we must know what is written by people and what is not.

Over 34 million AI-generated images are available to view every day. 76% of people admit they cannot tell the difference between what is real and what is not. Creating art is one thing. Creating misinformation is another. It should be a concern to all of us that the line between truth and fiction is becoming blurred.

What AI does is give your ideas a boost in a timely manner.
