THE VISION OF POWERSPLASH PROJECT

The mark of a successful training presentation is the amount of sustainable information and retention for the viewer. Knowing time is scarce and attention spans short, we have designed 4 to 30 minute innovative training solutions available via streaming or an LMS course.

On creating a business orientation series for students, temporary workers, new hires, and seasoned professionals alike, we feel that true education and transformation occurs when the whole of a subject is presented in full rather than just in part. Widening one's perspective while acquiring vast knowledge is crucial to understanding a subject, ourselves, and others. Now, let us apply this to business. For an organization to be successful, sustainable, and pleasant both for the employee and the customer, it is imperative that standardization is in place, enforced, and exemplified from the top down. An impressive resume does not necessarily guarantee a constructive attitude, common sense, or team player. To understand the myriad of components that comprise a successful organization, one must shine a light on the entire operation – and how each part adds to the whole.

Imagine a workplace productive, sustainable, enjoyable, and safe. Imagine coworkers energized, compassionate, cooperating, and creative. Every employee and manager benefits from ongoing training. Indeed, transformation in the workplace begins with transformation within each person. An effective training film must expose the viewer to the whole, widen the view, and how everyone impacts the work environment. Themes of positive image, compassion, responsibility, and positivity should flow through every frame. Most important, avoid blame – emphasize responsibilities and expectations. The results of an effective training program are enormous when everyone is supported, educated, and on the same page. Coworkers with a problem will learn they are not alone and can change. Coworkers without a problem will learn to be aware and supportive for the coworker *with* a problem. Education, self-evaluation, and desire-to-serve are the foundation of an insightful, cooperative, and attractive coworker.

In addition, since 2015, PowerSplash Project has created documentaries with mental health themes and social awareness. To date, 15 of their films have been in 395 film festivals and have won 178 awards.

Business Essentials Series

BUSINESS ESSENTIALS

Adapting to Change
4:00

- Learn how to confront resistance and fear of change
- Concentrate on the benefits of change at work
- Learn how change helps a company to strive

We all wish for things to be better and more effective yet often dread, if not fear, the steps for improvement and a change to our current routine. Many people think they can control the environment around them when, in fact, all we can control is our thoughts and reactions. By learning to accept that change is natural, we can begin to adapt more quickly. Keep in mind you do not have to like the change but you do have to find a way to cope without fear of failure, fear of success, or fear of the unknown.

Compassion Fatigue
5:25

- Explore ways to move through depression
- Observe a positive perspective visualization
- Remind yourself that you are here for a reason

Compassion Fatigue is a combination of physical, emotional, and spiritual depletion. We are proud of the professionals and volunteers who follow their passion and help the lives of others. And with such responsibility comes rewards for caring and a cost for caring. Caring too much can hurt. Often, we forget that taking care of ourselves is an essential component to helping others. Acknowledging the occupational hazards of care giving is the first step toward preventing secondary traumatic stress.

Customer Service: Communication
4:20

- Learn how to prepare your mindset before work
- Learn how to employ good phone techniques
- Learn the key to great customer service

Every person that walks into your store or contacts you by phone or online is entitled to your respect, your assistance, your expertise, and your undivided attention – yet 89% of shoppers have stopped buying from online stores after they experienced poor customer service. This is a lost opportunity because great customer service translates into more sales and repeat customers. Indeed, communication is the key.

BUSINESS ESSENTIALS

Customer Service: Difficult Customers
5:25

- Learn how complaints are a major source of learning
- Learn the behaviors that frustrate a customer
- Learn techniques to manage a difficult customer

The best way to manage a difficult customer is to put the word “difficult” in perspective. A customer perceived as difficult may be more in the eyes of the customer service representative than the customer. Customers react to stress and disappointment in a variety of ways. They need someone with whom they can vent, someone who will provide a quick resolution. Businesses who understand how to manage difficult customers can reap huge rewards.

Customer Service: How to Excel
5:00

- Learn how the internet makes complaining easy
- Learn ways a company can excel using great service
- Learn how to deliver top quality customer service

The internet makes complaining easy – but comments and statistics are the roadmap to marketing and improvement. Statistically, consumers are engaged, informed, and have limited time to make purchases. Do not lose them due to poor customer service, poor telemarketing techniques, poor order processing, or poor technical support. Every single person in your organization should be caring for the customer in ways that exceed their expectations.

Customer Service: Reasons to Excel
3:50

- Learn the importance of great customer service
- Learn the reasons why a company needs to excel
- Learn the role of the manager and employee

The term ‘call center’ was first published by the Oxford English Dictionary in 1983. It is not just a department; it reflects the company. And everyone in the company must agree they need customers. If you work for pay, the customer guarantees your paycheck. A company wishing to excel should know the best strategy to increase profits is to provide great customer service through phone and email support, web forms, chat rooms, and social media.

Email is the preferred choice of communicating for most of us, and most of us are overwhelmed by the number of emails we receive each day. In fact, we spend 13 hours a week or 28% of the workweek managing emails. While millennials prefer improvised texting for personal use, companies expect highly planned professional emails. - Learn the five components of Emotional Intelligence
- See the importance of correctly interpreting emotions

We all know the term Intelligence Quotient better known as IQ but there is also Emotional Intelligence which is another kind of intelligence and affects 58% of your performance, physical health, mental health, and your relationships. Grief is a natural response to the loss of a loved one, a divorce or relation break-up, loss of a job, or death of a pet. Some people think of the grieving process as a rollercoaster, with ups and downs, highs, and lows. It can become problematic if we act out in a fit of jealousy or worse, wallow endlessly in bitterness and resentment.

Mastery of Self-Awareness
4:00

- Learn how to look at ourselves objectively
- Learn to move beyond your default point-of-view
- Learn the first step toward success is always inward

Ninety per cent of the population complain about their life – but do we take responsibility for why our life is the way it is? Ask yourself: Do you make things happen, or do things just happen to you? Do you create opportunities? It is common to avoid responsibility, avoid problem-solving, or avoid looking at ourselves in a truthful way. It is all right not to know all the answers – that is what experience is for. But taking problems head-on will make you more liberated and aware.

- Learn how to create efficient minutes

In fact, to be right was so important that, when wrong, our first reactions could have been to deny it, be defensive, blame others, or internalize it. As adults, it is no wonder why so many people fear making mistakes – even to the point of viewing failure as permanent and success as temporary. What if we learned that mistakes can be useful? Sometimes learning is “trial and error.”

Unfortunately, many owners and managers get caught up in the spinning wheel of everyday operation. Let us change that!

BUSINESS ESSENTIALS

The Truth about Deception and You
4:00

- Learn why we tell lies
- Learn statistics about deception
- Learn the clues to spot if someone is being dishonest

“Deception” is defined as the intentional withholding of information or deliberately misleading information to a participant. We lie. Often for good reason – but we lie. Children can deceive as early as 6 months using fake laughter or pretend crying to get attention. To maintain healthy relationships, it is an innovative idea to learn the cues and clues when someone may not be telling the truth. Please keep in mind these are clues and, in and of themselves, may not prove guilt.

The Truth about Deception in Business
4:00

- Learn how lying adversely affects the workplace
- Learn how liars distort information
- Learn the clues to spot an employee being dishonest

Deception. Businesses lose about 5% of their revenue due to fraud each year, which is 3.5 trillion worldwide. From fraud and theft to leaks and embezzlement, deception often ruins innovation, damages teams, and destroys reputations. We probably all can agree that manipulation, disinformation, and histrionics have no place in the workplace. It would be beneficial to train yourself and your staff to understand and spot deception. Businesses benefit from an honest culture – and it starts with you.

Turning Apathy into Proactivity
6:45

- Learn why apathy exists in the workplace
- Learn how to deal with apathy in the workplace
- Learn how employees can overcome apathy

Everyone has the right not to know and not to care ... but there is a price for being uninformed and disengaged. Three things are needed for optimal mental and emotional health: Passion, Interest, and Action. A child is not born apathetic. The problem may have taken root at home, at school, or perhaps deep within them. But indeed, it must be addressed. With the right tools and the right attitude, you will be able to manage anything and be open to many opportunities and feelings.

BUSINESS ESSENTIALS

The Two-Minute Mental Break
4:00

- Learn the importance of taking a brief mental break
- Learn ways to relax during a brief mental break
- Learn why it is essential to ritualize relaxation

The average American works 9.2 hours a day. Though American work laws require all full-time employees to take a lunch break – only 1 in 3 coworkers actually take one. The remaining 2 in 3 eat at their desks and do not even take short breaks (especially if their managers do not). Did you know that taking breaks may reduce headaches, eyestrain, and lower back pain? Businesses need to understand the benefits of mental breaks. Schedule your breaks and make them a habit.

Vengeful Games at Work
4:40

- Learn the reasons employees seek revenge
- Learn the dangers of revenge
- Learn how to manage thoughts of revenge

When we are hurt, it is a natural response to return the hurt. And our reasons may be logical but none justify retaliation. When plotting to hurt another, we are consumed with immature beliefs and reactions instead of sound judgment. Revenge is a primal need for self-defense. The goal is to rid one of shame and humiliation and restore power and pride. You want satisfaction and justice in the present. You want reassurance it will not happen again in the future. But seeking revenge only perpetuates the cycle of pain.

A Workplace Free of Negativity
4:30

- Learn how to recognize common behavior issues
